

CROSSFIELD CHRONICLE

VOL. XXIII. No. 52

CROSSFIELD, ALBERTA, THURSDAY, JANUARY. 28th. 1932

PRICE 1.50 A YEAR

Laut's Store News

A visitor in China was surprised to see men carrying lighted lanterns in broad daylight last January. He found that Chinese custom requires payment of debts before the end of the year. These men had not discharged their debts. They had not finished with the old year and were carrying lanterns to signify that for them the New Year's sun had not risen. Has the sun risen for you.

Things getting a bit dingy about the house, try our
Waxes and Polishes---

Old Timers All Ready For Annual Round-Up

A meeting of the committee in charge of the annual round-up of the Crossfield and District Old Timers Association was held in Laut's store on Saturday evening, and final arrangements were made for the big annual event on Tuesday, February 2nd.

The banquet will be held from 6.30 until 8.30, entertainment and dance to follow.

The Hopkins Old Time Radio Orchestra of Calgary has been secured for the dance. The Oliver Cafe will again do the catering. Wm. Laut and R. M. McCool will have charge of the entertainment, and everything is all set for a big night. Bigger and better than ever is again the slogan.

Membership tickets can now be secured from the secretary—Hughes McIntyre.

New Village Assessment To Be Made This Year

The annual meeting of the ratepayers of the village will be held in February although the date has not yet been set.

The council has very wisely carried out a policy of rigid economy throughout the year.

A tax sale was held this fall with the result that a considerable sum was realized from the arrears of taxes—some of which had been piling up for years. As a result of this sale, which enabled the village to pay off their obligations and save interest charges, together with the savings effected in every department during the year, it can only be expected that a reduction of taxes will be made this year.

A new assessment of the village is to be made this year. We understand that the government assessor has volunteered to come down in March and make the assessment. It was pointed out by the Chronicle the unfairness of the present assessment, but with a competent, disinterested party making the assessment, everybody should be satisfied, but they won't.

Mr. Asmusen's term of office expires, and it is to be hoped that he can be induced to stand for another term. "Chris" is an ideal councillor, he does his own thinking, uses good judgment and is fearless.

It might be advisable for the council to devise a better means of collecting the business tax. At present there is nothing to prevent a business man—who is a renter—from doing business for several months and then leaving the town without paying. We know of one case in particular where a business man has gone out of business and had not paid his business tax for three years, and has left the village high and dry holding the sack.

At the last annual meeting a lengthy discussion took place as to ways and means of securing an adequate supply of water for the skating rink. It was decided by the ratepayers that something should be done. One of the suggestions was to dig a reservoir, and have it done by volunteer help. At any rate the council did not act on any of the suggestions and a water supply is still badly needed.

The re-organization meeting of the Sunshine U. F. A. Local was held at the school on Wednesday evening of last week. There was a good crowd out and general questions of every nature were dealt with. The question of tax reductions, the Municipal Secretary's salary, binder twice rebate and co-operative buying were among the subjects brought up.

Mr. H. Mellings acted as chairman and Mr. J. R. Laut as secretary.

Bottrell Youth Is Killed When Wagon Overturns

Thrown from a wagon-load of logs, Eugene Florer, 19-year old son of Harry Florer of the Bottrell district, was almost instantly killed Friday afternoon near his home. He died of a broken neck.

An inquest was not necessary, according to Dr. T. A. Wright, Calgary coroner, who believed that death was accidental. Deceased is survived by his father.

Having loaded his wagon with logs, the lad was proceeding towards his home. Coming down a steep hill, the wagon wheel struck a rut and overturned, throwing him clear. He landed on his head, however, with sufficient force to break his neck.

Funeral services were held on Monday afternoon from the Cochrane United church.

Annual Meeting United Church

The annual congregation meeting of the Crossfield and District United Church was held on Monday evening last in the Masonic Hall basement. The attendance of about one hundred showed the lively interest taken in the Church and its organizations.

Rev. Young conducted the devotional part, after which Mr. Stralo, chairman of the Board, occupied the chair, and called for the reports of the different branches in connection with the church work.

C. G. F. T. report was given by Marjorie Young, secretary. Mr. Tweedle, leader, gave the report of the Tuxis Boys. Mack Purvis, mentor, gave the report of the Trail Rangers. The report of the Sunday School was next presented by Rev. Young. Choir report was given Mr. E. C. Collier. Ladies' Aid report was given by Mrs. Methers, president, in the absence of the secretary. Report of the Inverlea Ladies Aid was next given by Rev. Young.

Minister's Report—This was given by Rev. Young who gave a brief outline of the work he had done, and expressed his sincere thanks for the help and co-operation given at all points.

Financial report was then given by the secretary Mr. Belshaw. Manager's report was given by Mr. Stralo.

The next item was the election of officers and Messrs. Stralo, Murdoch, Methers, Gilchrist, McCool, Winning and Belshaw were elected as managers for the ensuing year.

This brought the business part to a close and the rest of the evening was spent as a social evening, during which musical items and games were enjoyed by all. The members of the Board afterwards served refreshments.

Rebekahs and Oddfellows Install Officers

The officers of Crossfield Lodge No. 42, I.O.O.F. were installed for the present term. Noble Grand, Chas. Fox; Vice Grand, Wilson Stafford; Rec.-Sec'y, J. L. McRory; Fin.-Sec'y, A. W. Gordon; Treasurer, Wm. Pogue.

At the joint installation held in the I. O. O. F. Lodge room Jan. 20th, Justice Rebekah No. 62, installed the following officers for the present term:

N. G.: Mrs. Lee Ableman
V. G.: Mrs. C. Richardson.
Rec.-Sec'y: Mrs. S. Willis
Fin.-Sec'y: Mrs. Chas. Fox
Treas.: Mrs. Wm. Pogue.

This is leap year girls make the most of your opportunities—Al Lindgren bought a car.

At the evening service next Sunday in the United Church Mrs. Young will sing a piece written and composed by herself.

Fragrance Sealed In Metal

In Times Like These

In the course of the more or less extensive reading in which every man in newspaper work must engage, our attention was attracted by a magazine article bearing the title "In Times Like These," written by former U.S. President Calvin Coolidge. Coming from the pen of such a noteworthy man we felt assured that it would be a worthwhile article. We were not disappointed, and have decided to pass on to the circle of readers of this weekly column some of the thoughts expressed by the only living ex-President of the United States, in the hope and expectation that they may be found helpful and provide encouragement to others.

Mr. Coolidge expresses the opinion that one of the serious results that come from the experience through which the world has been passing for the past two years "loss of faith," and he proceeds to show that if a man but keeps his faith, regardless of anything and everything that may happen, there is still a bright future before him.

The difficulty is that because some have put their trust in things which they have found do not always endure, they draw the hasty and unwarranted conclusion that it is useless to have faith in anything. Furthermore, there is a tendency, and it is easy, to conclude that whatever disasters may have overtaken an individual for him to conclude that they have arisen through his fault of his own; rather that it is the fault of someone, and he is inclined to blame something he loosely calls society.

It is true that some have lost through the dishonesty of others. Many more have lost because they were tempted to take large risks in the hope of making large gains. Some did make large profits, but many more suffered heavy losses. Frankly, it must be said that those who trust to chance must abide by the results of chance. They have nobody to blame but themselves. In Western Canada, however, probably the larger number of losers are to be found in Mr. Coolidge's third group, those who have sustained losses notwithstanding the exercise of their best judgment and through causes beyond their own individual control. But this simply means what everyone should know: that even when surrounded by all the safeguards and all the integrity which is possible to secure, the ownership of property involves a risk. The man who has nothing runs no risk; it is the man who has property who is liable to suffer. Nevertheless no sane person prefers to be the former rather than the latter.

The man who owns a house may lose it by fire, by flood, by a devastating storm. A man's livestock may sicken and die. A man may lose his crops by drought, or hail, or insect pests. World conditions may force prices to a below-cost-of-production basis. He cannot help these things, but that does not excuse him from making the most of what he has. The great fact of life is uncertainty, as Mr. Coolidge points out. The only thing we can do is to recognize the uncertainty and govern ourselves accordingly.

It might be a great personal comfort if we could lay all the blame for our misfortune upon some source outside ourselves. That is why it is easy to convince some of us that we have not failed, but society has failed. But while there is a relationship of all of us, which we term society, that differs from each of us, just as a house differs from the individual bricks in it, yet people are not bricks, and moral responsibility cannot be shifted to others. If we are to be free to make our own choices in life, we must take the risk of being responsible for the results.

If we could lay the blame for present conditions in the world on society at large, against whom is the blame to be assessed? It is impossible to point out any general moral lapse, any widespread dishonesty. We may say it is the result of greed and selfishness. But what body is to be specifically charged with that? Were the wage earners too greedy in getting all they could for their work? Were the managers of enterprise, big and little, too greedy in trying to operate at a profit? Were the farmers too greedy in their production or in co-operating to get higher prices for their products?

No, the most we can say is that there has been a general lack of judgment so widespread as to involve practically the whole world. Each and every one of us to assume our full share of responsibility for that lack. We have found out that we were not so big as we thought we were. We were riding too high. We shall have to keep nearer the ground. We may not feel so elated but we shall be much safer.

We must realize that the best recipe for financial security is to live within our means. That is our ancient faith. We have found nothing better.

We must re-learn the old Biblical admonition: "Thine own right hand can save thee." We must realize that Governments are not all-powerful, that present relief measures are but a crutch to help for a moment when we cannot otherwise help ourselves, but that our salvation, our whole future, rests with us as individuals.

There is no power that can absolutely guarantee us economic security. We think we want relief from toil and worry, forgetful that our real satisfactions are in our achievements. If we will but make the effort to develop them, if we will apply ourselves faithfully to our tasks, we shall all find we have powers we did not know we possessed.

Drop In Living Costs

Reduction Of Fifteen Per Cent. During Last Two Years

Cost of living has dropped by over 15 per cent. during the past two years, the Dominion Bureau of Statistics reports. This is the second largest decrease among the leading nations, the United States leading with a drop of 16.5 per cent.

Germany ranks third with a 12.9 per cent. drop, Great Britain fourth with 9.6, and France fifth with 8.9 per cent. One of the reasons Canada, United States and France rank so high is the extensive agricultural developments of these countries.

The modern telephone instrument consists of 201 parts.

Embargo Is Removed

Livestock From Britain Again Allowed To Enter Canada

A ministerial order issued by the Department of Agriculture removes the embargo against the importation of livestock from the Old Country which has been operative since June 30, 1931.

Issuance of permits for the importation of British livestock was with the Department of Agriculture last June owing to serious outbreaks of the dread foot and mouth disease in various sections of the Old Country.

It has been estimated that Colombia's waterfalls could be harnessed to produce more than 4,000,000 horsepower.

Palpitation of the Heart Could Hardly Get Around

Mr. Charles Storms, R.R. 5, Pictou, Ont., writes: "I was troubled with palpitation of the heart; couldn't sleep day or night, and was so weak I could hardly get around."

After taking Milburn's Heart and Nerve Pills I was greatly relieved of these attacks. My mother also has great faith in them and finds no other medicine can help her so much for heart trouble.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful builder."

Man Without a Country

Pitiable Flight of Negro Who Was Deported From Canada

Chained to a grating in the hold of a ship in port, where he has remained for more than a month, is another man without a country.

He is Cecil Jaffe Scott, 29-year-old negro deported from Canada and unwanted in his alleged homeland of Bermuda. He was put aboard the steamer "Borsund" at Halifax, and when permission was refused to land him at Bermuda or Demerara where the authorities had no information concerning him, the only alternative was to bring him back to Canada. Having previously been deported from the Dominion, he was refused admission when the "Borsund" arrived at St. John, and now the captain and immigration officials are wondering what they shall do with the passenger.

The steamer's owners are liable to a \$1,000 fine if the deportee escapes. So "down below," in an improvised cell formed by a grating, is the "man without a country," his right wrist fastened to the steelwork and a blanket serving for a bed.

Cut In Salaries

Manitoba Government Orders Six Per Cent Reduction All Along the Line

Six per cent. cuts in salaries of all employees of the inside government service, from cabinet ministers down to the lowest paid civil servant, were ordered by the Manitoba Government. The cuts were effective as from Jan. 1. This order will make provincial salary cuts the highest of any government in the Dominion.

It is anticipated that governing bodies of provincial services and educational institutions will follow the lead of the government and also order corresponding cuts. A saving of \$200,000 is expected to result from the reductions.

Ship Fox Skins

Seven Thousand Fells Leave Quebec For London Market

During recent days 7,000 fox skins have been shipped from Quebec to be placed on the London fur market, according to information given out at the office of the Co-Operative Fur Animals Raisers of the province of Quebec. This shipment of furs, the largest ever sent out from here, is valued at \$200,000 and consists of all of skins of the best quality.

In the face of orders on hand at present, Co-Operative officials say, it is probable that an additional 10,000 skins will be placed on foreign markets in the very near future.

Persian Balm tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates complexion of equine charm. Adds a subtle tint to the daintiest woman. Invaluable for softening the hands and making them flawlessly white. Cool and refreshing. Daily fragrant. Delightful to use. Chosen unhesitatingly by all women who care for feminine distinction.

Cannot Hoard Gold

Viennese who have taken to hoarding gold in their mouths in the form of fillings, crowns and bridge-work have bitten off more than they can chew. Firms which cast gold bridges and similar material for dentists, have been doing a good business lately. The National Bank, which now has the sole right to sell gold, says temporary fillings will have to do until the gold crisis is past.

Toothache and neuralgia are instantly relieved with Douglas' Egyptian Liniment. A quick, sure remedy. Also recommended for burns, sprains, sores and inflammation.

The total value of building and construction awarded in Canada during 1931, as compiled by MacLean Building Reports, Limited, amounted to \$315,482,000. Ontario led all the provinces with \$135,482,000, or 39.8 per cent. of the Dominion total. Quebec comes next with \$106,125,700 or 33.6 per cent.

Land and Water Ferry

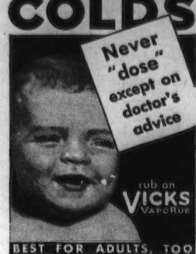

Hotel guests at Devonshire, England, now use a ferry that travels on land or sea. It is equipped with tractor wheels for land, and a propeller driven off the tractor motor to drive the ferry through water.

In 1807, the first raft of pine cut in the Ottawa Valley reached the City of Quebec.

Fulurism is a disease which attacks poultry in much the same manner as typhoid does humans.

W. N. U. 1929

BABY'S COLDS

Astrologer Makes Some Unpleasant Predictions

Says 1932 Hard Year For Cattle and Married People

Prof. Gustave Meyer, of Hoboken, New York, who describes himself as "the nation's counsellor and American scientific astrologer" cast his eyes heavenward, added up several rows of figures and predicted that 1932 is going to be a tough year for cattle and married people.

In scanning the planets for his annual list-of-the-year forecast, Professor Meyer considers that Japan and China are going to have much trouble, and that Japan will get the best of it in the long run. He feels that prohibition is going to have "a terrible time" during 1932, that prosperity is coming back to stay, that Colonel Lindbergh and Henry Ford had better watch their step in February and that next fall there will be plenty of rain, snow, hail, thunder and lightning, floods, earthquakes, bank failures, broken legs and stomach trouble.

Among those who will suffer during the year, according to the professor's charts, are theatrical people, hotel and restaurant people, steamship people, bull traders, naval officers and cabinet members.

Those who will enjoy good luck include literary people, scientific people, astrologers, mining men, real estate agents, President Hoover, soldiers, diplomats and all the unemployed.

Places Unknown To Man

Large Unexplored Region In Arctic and Antarctic Regions

Although the airplane, the motor car, the motor boat and other mechanical conveniences of recent years have helped wipe out many of the larger blank areas, marked "unexplored" on the maps of the world, the National Geographic Society, in a current bulletin, says there are still "many regions traversed only once or twice in history and a few that have never been seen by civilized man."

"Unquestionably the largest unexplored spot in the world today lies in the continent of Antarctica," the bulletin states, adding that though the Pole has been reached twice and the coastline skirted, of the interior only the pie-shaped sector leading inland from the shore of the Ross sea has been explored.

"Antarctica remains the greatest stronghold of nature against the curiosity of man," it continues. Next largest lies at the opposite end of the earth, that part of the Arctic Ocean between the airship "Norge's" path, on its flight over the North Pole and the coast of Siberia. It measures about 900 miles long and 400 miles wide, with an area about the size of Texas.

Large tracts in Greenland, Arabia, South America and Australia, have yet to be seen by man, the bulletin states.

Experiments are being made in Chicago, Ill., of a ray-producing device which, according to the inventor, will destroy ammunition on land, air, or sea at will.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Compressed air apparatus has been perfected to increase the volume and improve the quality of the tones from loud speakers of either radio or phonograph music.

The total expenditure by the different Provinces of Canada on main provincial highways during the year 1930 was \$24,552,750.

A new material for phonograph disks is capable of recording on one disk double the amount of music on an ordinary disk.

Shipping Gold To Britain

India Expected To Double Last Year's Entire World Output

India has shipped more than \$100,000,000 worth of gold to London since Great Britain suspended the gold standard, and it shipments are continued at the present rate they are expected to double last year's entire world output of gold which was approximately \$420,000,000.

More than \$9,000,000 in gold was shipped to London in one day recently. This steady output is regarded by financiers as an important contributing factor to the recent rise in the pound sterling.

More than in any other country in the world gold is the standard of value in India. All classes hoard it in the settings for jewelry, coins and other valuables, and banking systems scarcely known in the Indian villages. Whenever an Indian in the interior wants paper money he ships his articles of gold to the government mint at Bombay where they are melted and coined.

New Ideas For Cars

Many Advanced Methods Will Feature Automobiles Of Future

The automobile industry, in its quest for new features to intrigue the buying public, spends millions of dollars annually in experimentation on advanced methods of automobile construction. Many of the ideas which result from the extensive research of the industry's engineers seem radical at first glance, but are a forecast of what may be expected for future automotive transportation. Among the many possible developments discussed in engineering circles is such a startling suggestion as a gasolineless, waterless car, propelled by radiated electricity. Another unusual proposal calls for the use of an airplane type of construction for cars, with large fenders and a combined roof and wing structure lifting a considerable amount of weight from the road, and with propulsion furnished by a propeller.

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Electric Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among oils and numbers of people are certain that it healed where properly applied.

Forestry Patrol Work

Brooks Airways To Undertake Government Work In Northern Saskatchewan

Forestry patrol work and government flying operations in northern Saskatchewan will be conducted during 1932 by the Brooks Airways, Limited, of Prince Albert.

Arrangements for this work were completed between government officials and R. D. Brooks, head of the Airways. The Brooks Airways conducted similar work for the government during the past year.

At the present time the Airways is operating four machines, two Stinsons and two Buehls, with a staff of three pilots and two mechanics.

You're Worried

When your child is sick you're terribly worried. Of course you can't always avoid sickness, but you can remedy and often prevent children's ailments with Baby's Own Tablets. They are the ideal laxative for children. Doctors prescribe them. Baby's Own Tablets reduce fever, allay colic, prevent constipation, sweeten the stomach, and help to clear up colds. 25 cents a package at any drugist's.

Stockmen Elect Officers

Meeting Of Canadian Livestock Co-Operatives Held At Saskatoon

W. A. Amos, of Palmerston, Ontario, was elected president of the Canadian Livestock Co-Operatives at a meeting of the directors held at Saskatoon. He succeeds W. D. Mackay of Saskatoon. Roy McPhail, Brandon, was elected vice-president of the organization.

Directors for the provinces are: Alberta—J. E. Evanson, Taber; Saskatchewan—W. D. Mackay, Saskatoon; Manitoba—Roy McPhail, Brandon; Ontario—W. A. Amos, Palmerston; Quebec—J. T. Desmarais, Montreal; Maritimes—J. McClellan, Prince Edward Island.

Real Benefit To Farmers

Shipping Club In Quebec Markets Produce To Advantage

A fine example of the real benefit to farmers in getting together to market their products is afforded by the results obtained by the Campbell's Bay Shipping Club, of Pontiac County, Quebec. This year to date the club has marketed 250 head of cattle, 250 calves, 1,150 lambs, and over 12,000 pounds of dressed poultry, representing cash returns to the farmers of that district of well over \$15,000. The Federal and Provincial Departments of Agriculture have co-operated effectively in making the scheme the a success.

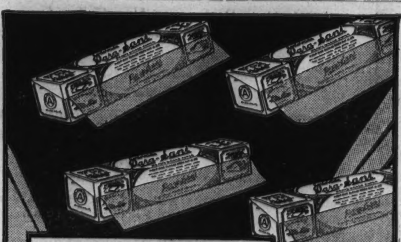

Hard Times For Chef

A year ago Chef Francisco Arroyo was preparing dainties for kings and queens, princesses, and princes. Today he labors over Spanish stew for the city brood line. He replies to questioners with graceful Spanish casualness, as he manipulates pots and pans in the free kitchen maintained by the city.

Mexico may abandon her navy under an efficiency program soon to be put into effect by Secretary of War Plutarco Elias Calles.

HUNTER-MARTIN & CO., REGINA, SASK.

Says Farmers Should Pay More Attention To Marketing Instead Of Concentrating On Production

Expressing the belief that the next 25 years would see the emancipation of agriculturists from domination by bodies outside themselves, H. S. Arkell, secretary of the Canadian Live-stock Pool and president of the Canadian Society of Technical Agriculturists, speaking at a gathering of the latter organization at Saskatoon, asked their assistance in that regard.

The society had made great strides since it was formed in 1921, and now included most of the technically trained agriculturists of the Dominion. In the past the members had chiefly concerned themselves with their own jobs and the co-ordination of work done under different authorities to make it efficient. They had accomplished a great deal in that direction.

But Mr. Arkell believed the time had come for the society to turn its attention to study the condition of agriculture. "It was for the betterment of agriculture that they had received their training."

From the point of view of the farmer, the selling machinery under the old methods had failed them, the credit machinery had fallen down and they would find that the majority of farmers believed that the technical machinery of agriculture was failing to accomplish the purposes of the farmers.

Agriculture had taken care only of production and left someone else to take care of marketing. In all other businesses an increasing proportion of the brains was devoted to merchandising. Something should grow up in technical agriculture in regard to the business end as in production. It was planned, the speaker said, to hold the annual convention of the society in Winnipeg in June, when it might be possible to secure speakers from the economic conference.

Dr. L. E. Kirk, Dominion Agrostologist, suggested that other businesses had perhaps devoted too much attention to merchandising and persuading the people to buy what they did not want, rather than that agriculture had given too exclusive attention to production.

W. A. Munro, Eastern experimental farm, agreed that farmers at the present time were much more concerned with what they were to do with what they had produced than to work to produce more or better articles.

Guests introduced at the gathering included: C. H. Gilbert, Big River, spring wheat champion at the Chicago show, and Andrew Anderson, Alaska, recently designated "master farmer."

To Settle War Debts

Suggests Exchange Of African Territory Instead Of Cash Reparations To Be Made

The rich Congo basin, lying in the heart of equatorial Africa, is proposed as payment by debtor countries, in the stead of cash reparations to the United States, by Stephen Leacock, head of the Department of Political Economy at McGill University, Montreal, in an article appearing in the New York Herald-Tribune Sunday magazine section.

Describing this area of 1,500,000 square miles, now owned in its three divisions by Belgium, France and Great Britain, as "exuberantly fertile," Professor Leacock points to the great possibilities of development. He says the great Congo River as the "real gateway for Africa trade," and says a real airport at the mouth of the Congo would "become one of the great harbors of the world's shipping."

He says the United States with its money, machinery and brains, is the one country to undertake the great development. Thus, would be set in motion, he believes, "A new world movement of prosperity."

"How did you get so much strength in your mouth?"
"I have exercised my teeth with your steaks."—El 420, Florence.

W. N. U. 1926

Canada Maintains Trade Position

In Spite Of Depression Ranks Fifth Among Nations Of The World

Canada reached the rank of fifth among the trading nations of the world in 1925, and has maintained that position, in spite of the years of depression, through its great industrial development and the utilization of its natural resources, Hon. Newton W. Rowell told the Canadian Club at Montreal. This very progress forces the Dominion ultimately to carry out the proposed deepening of the St. Lawrence waterway to the Great Lakes.

Mr. Rowell was discussing the economic relations between Canada and the United States, and in this connection spoke of the St. Lawrence scheme.

"We have been blessed," he said, "with this great water highway system reaching from the Atlantic to the centre of the continent. Whether we like it or not, sooner or later we will have to develop it."

The speaker traced the growth of Canadian trade during the past six years, pointing out that it had multiplied five-fold in that time, partly as a result of large investments made by foreign countries in Canadian industry.

Largest investor in the Dominion was the United States, which had some \$3,790,000,000 in Canadian industrial plants and in various types of securities.

"This period of depression and low exchange may not be an ill thing for us in Canada if it teaches us to be no longer extravagant in our borrowings; to live within our incomes and to pay off our debts," said Mr. Rowell.

Winnipeg Newspaper Union

THE NEW SPORTS BLOOMERS ARE EASILY MADE

You'll love the cut of these smart sports bloomers.

While they are quite roomy, they hug the figure through the hips. Elastic is inserted through the hem and the upper edge.

Made in a jiffy! They can easily be made in an hour. After they are cut out, just a few seams to join.

Style No. 373 is designed in sizes 26, 28, 30, 32, 34 and 36 inches waist measure. The 30 inch size requires 1 1/2 yards of 35-inch material.

Crepe de chine, crepe satin, and fine cashmere jersey are suitable. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Death Ends Long Seclusion

Fanny Read, 89, who left the seclusion of her home only four times in 67 years after her father forbade her saying goodbye to her soldier sweetheart in the revolution of 1862, is dead at Binghamton, N.Y. Miss Read shut herself in her home and left it only four times—each time for the funeral of a relative—during the ensuing 67 years.

An owl sleeps because its eyes are fixed immovably in their sockets.

Greater Precipitation

Report Of Meteorological Service For Month Of December Is Encouraging

Precipitation in Saskatchewan over the cultivated portion, during December, 1931, was approximately twice that of December of the normal year, according to the report of the Dominion meteorological service, for the month.

In average years, precipitation in December varies from four-tenths to about eight-tenths of an inch. During December, 1931, from one inch to one and a half inches was reported over a considerable area in Saskatchewan.

In the extreme southeast and in a small area to the east of the Cypress Hills several points were exceptional reporting less than four-tenths of an inch of precipitation received during December.

Alberta rejoiced in precipitation that was in excess of the normal. In December from one inch to one and a half inches was reported from a considerable portion of the plains. Usually the December precipitation in these areas varies from less than one-half to about three-quarters of an inch.

A dry December was the experience of Manitoba, where most sections reported less than half an inch and some less than one-tenth.

In the majority of years, December precipitation is slightly greater in Saskatchewan, ranging from one-half inch to one inch.—Regina Leader.

Apples Are Cheap Food

Essential Part Of Diet And Suitable For Every Meal

In a period like the present, when the amount of money available for food may be limited, apples are an essential part of the diet, says Miss Flora Carl, of the Missouri College of Agriculture. "Apples are suitable for every meal in the day and are often enjoyed between meals also," she goes on.

"As sauce or baked, apples serve as a breakfast fruit, and with bacon or sausage they may accompany the meat dish. For dinner they are especially good with fresh or cured pork, no matter how it is cooked. They are adapted to cooking with many vegetables, as baked with sweet potatoes, fried with carrots or scalloped with cabbage. A wide variety of salads may be made from apples, either raw or cooked with vegetables, and the choice of apple desserts is almost unlimited."

Noise Affects Eyesight

One person in every five in the towns and cities is wearing, or ought to be wearing, spectacles. The proportion in the rural areas is only one in every 100. An eye specialist said:—"During the war one of the effects of shell-shock was a narrowing of the victim's vision. Perfect eyesight depends on perfect nervous, and town dwellers today are exposed to a nerve-shattering barrage of noise which differs only in degree from a great gun cannonade."

Neighbor: "Er—Mrs. Brown— you've got odd stockings on."

Mrs. Brown: "Yes, dearie, that often 'appens to ladies what 'ave got more than one pair."

A writer asserts that a man's character can be told by the books on his library shelf. Then most of our friends are kleptomaniacs.

Egg Exports From B.C.

Are Bringing Producers Over Five Thousand Dollars Daily

British Columbia hens are bringing into the pockets of poultry owners, as a result of growing volume of shipments of eggs outside the province, in the neighborhood of \$5,000 a day.

The B.C. Egg Pool is shipping to the prairies and eastern Canada three and four carloads of eggs weekly. Private firms are adding further shipments, which, according to G. R. Wilson, of the poultry division, Dominion Live Stock Branch, bring the total up to one carload daily.

Each carload at Montreal brings an average of \$7,000. There must be deducted from this freight charges of approximately \$350 and handling charges of five cents a dozen.

The egg industry is at present the liveliest department of agriculture in British Columbia. Distribution of \$5,000 a day among poultry ranchers is bound to stimulate confidence in the poultry industry.

Egg prices are much lower than at the same time in 1930. Production is also lower. Nevertheless, present prices are attractive to the consumer and lower labor costs help to make up for the reduced prices received for the product.

George P. Wallace, president of the B.C. Egg Pool, reports falling off of production of eggs elsewhere in Canada.

Prof. E. A. Lloyd, University of British Columbia, says that the present export of eggs is but the beginning.

"I look to see British Columbia poultrymen exporting eggs to overseas markets as well as our domestic markets," said Professor Lloyd.

France Buying Wheat

French Government Contracting For Ten Million Bushels Of Canadian Grain

Delivery has started on a French government contract to buy 10,000,000 bushels of Canadian hard spring wheat, the United Press learned. The agreement represents a repetition of an order for a similar amount in 1930. Delivery will continue for two months.

It was understood that France expected a reciprocal concession from Canada favoring either French wines or silk, but no agreement has been reached.

It was estimated that France still requires 11,000,000 bushels of foreign wheat to meet the deficit in domestic supplies.

Wheat representatives were awaiting indications of whether the foreign office would continue the policy of buying Central European wheat for political reasons, or would buy the balance in the open market from Canada, the United States and Argentina.

Advertising Always Pays

The business has not been found in which "advertising does not pay." What capital is to industry, what rainfall is to farm soil, advertising is to business. Advertising is as necessary to national distribution as the railroads.

The reason people are patient with statements is because they don't know what to do, either.

Nearly 40 irrigation projects are to be launched in Jugoslavia in the next four years.

Scientists Hope To Procure Facts And Figures To Test The Theory That Continents Float

Sensitive To Weather Changes

Animals Are Very Quick To Notice Any Variations In Weather

Animals are amazingly sensitive to changes of weather, and some very interesting observations have been made as to how they behave under such circumstances. We have all seen the antics cats get up to when a storm is approaching. They wander restlessly to and from, and suddenly dart about the house and garden in a most surprising manner. Cats, too, wash right over their ears when rain is approaching. The following are other unmistakable signs of changing weather: In mountainous districts sheep change their feeding ground to the lee side, or side opposite the wind, of the hills before the arrival of gales and rain. Little field mice, too, appear to know when cold and snow will set in, for they have been observed to cover up their holes carefully before hard weather comes. Donkeys invariably Bray lustily before rainy weather, and it has been returned to the hives and do not come out again for a time rain is indicated.

Canada is vitally interested in settling the Wegener theory because Greenland is supposed to be the "speed king" among the continents, crawling westward at a rate estimated as high as six miles a year. Meteorological conditions, especially along the Labrador Coast, the Maritime Provinces and the New England States, would be affected by any appreciable narrowing or lengthening of the distance between the two land masses.

Dedicate scientific observations were made some years ago at the Dominion Government Observatories at Victoria and Ottawa. Longitudinal measurements were extended around the world with the aid of beam wireless. The positions of America, Greenland and other countries were plotted as minutely as possible. The observations will be repeated in 1933 and again in 1936, and any variation in the plottings will be noted. By this method it is hoped to establish the accuracy of Dr. Wegener's hypothesis.

The first evidence to substantiate the drifting theory was established in 1907 by J. B. Koch, German explorer. In 1823-34, British explorer—Sir Edward Sabine, British scientist, made longitudinal observations in Greenland, but when Koch took similar readings at the same spot, the figures did not correspond. The only explanation was that Greenland had drifted several miles toward North America in the intervening years.

Farm For Strayed Animals

Fifteen Acres Operated By Voluntary Workers In Montreal

"The League of Justice To Animals" with voluntary workers operate a farm of 15 acres at Montreal, the only one of its kind in Canada, where lost, strayed or unwanted animals found on the streets of Montreal and environs are taken, and when not claimed within a reasonable time are placed with new owners. At this home there are adequate kennels for cats and dogs, stables for horses and good grazing land with plenty of shade trees. Every type of creature is cared for from goats to canaries. Horses whose owners are too poor to feed them properly are taken and within a short time returned in good condition.

In the society's six years of befriending the dumb animals, it has had four Christmas trees set up in various parks and squares here distributing hay, corn and oats to 100 horses yearly.

Fewer Wolves Taken

Export Of Wolf Pelt Shows Signs Of Falling Off

Production and export of wolf pelts are falling off, which opens up the question as to whether or not wolves are decreasing in Canada.

In the calendar year 1931 the export of the skins of wolves totalled 41,972 at a value of \$383,652, according to the records of the Dominion Bureau of Statistics. In 1929 the export was 96,796 wolf pelts at a value of \$1,565,476.

Saskatchewan is the first province to make returns for the hunting season of 1930-31, when 115 timber wolves and 9,653 coyotes were taken. In 1929-30 the take was 134 timber wolves and 12,717 coyotes.

Built to house 150 guests, a hotel in Antrim, England, which is becoming quite a popular holiday resort, has not a single bathroom. The town itself has no public water supply.

Great Natural Asset

High Grade Clay Deposits In Saskatchewan May Prove Foundation Of Great Industry

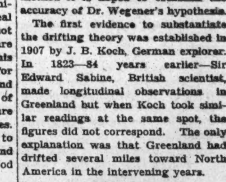

One of the greatest natural assets of the prairie provinces is constituted in the high grade clays of southern Saskatchewan, said G. M. Hunt, assistant director of development for the Canadian Pacific Railway, speaking at a luncheon held by the officers' association of the company at the Royal Alexandra Hotel in Winnipeg. He said that they would in time be the means of support for an immense clay products industry.

In describing these valuable western resources, Mr. Hunt told of the general work of his department in fostering Canadian industry by locating deposits of minerals and sources of other raw materials and by assisting in bringing these materials into use. W. C. Casey, president of the association, was chairman.

Royal Palace A Public Museum

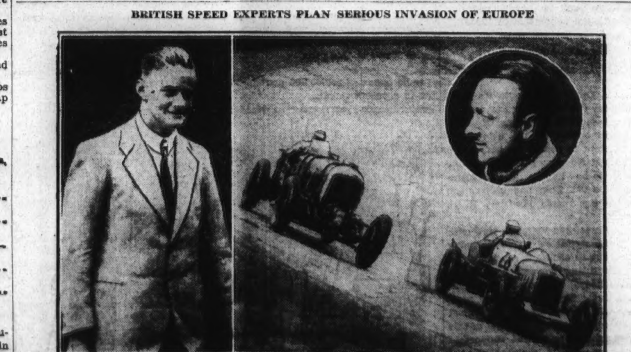

Ex-King Alfonso's former royal palace at Madrid has been opened as a public museum. For the sum of one dollar visitors are allowed to see the throne room, sitting rooms, banquet hall, the famous "Hall of Columns," where so many functions, including that of the washing of feet on Good Friday, took place, but so far they have not been permitted to visit the private apartments and bedrooms formerly occupied by King Alfonso, Queen Ena, and the Infanta.

At the National Dairy Show held recently at St. Louis, Missouri, U.S.A., a British Columbia two-year-old Holstein heifer, "Colony Wood Colantha," No. 194433, was declared Champion Holstein of North America.

"You are bandy-legged, Fridolin."

"That is nothing. He ought to have seen my brother. He was no bandy-legged, but he had to be buried in an old band vol."—En Rollig Half Timms, Gothenborg.

An invasion by a team of British racing drivers with British cars into the most cherished preserves of Continental road racing is contemplated by a team of British drivers. The Italian "Mille Miglia" or 1,000-mile race, held every spring, is the only contest of its kind in the world, and last year, for the first time in the history of the race, an English car competed, driven alternately by an English and an Italian driver, neither of whom could speak the other's language. It finished successfully, much to the surprise of the Italian people. In this year's race, April 9 and 10, British drivers propose to enter a team of three cars, which would be driven by whom could speak the other's language. It finished successfully, much to the surprise of the Italian people. In this year's race, April 9 and 10, British drivers propose to enter a team of three cars, which would be driven by the best racing team the Motorists could produce. Sir William Morris, British motor magnate, will back the venture, and Sir Henry Birkin (right), will be one of the drivers. It is expected Lord Howe will captain the team.

Over 50 tons of express and 34,892 pounds of mail were carried on the north route between Edmonton and Aklayik, by planes of a commercial aviation company during the season of 1931.

War's Lessons

Canadians Have Deep Interest In Situation In Manchuria

"We have not forgotten the lesson which we learned in 1914 of what an obscure crime in a Balkan state can mean," said Hon. Vincent Massey, former Canadian Minister to Washington, in addressing the Empire Club on Manchurian problems at Toronto. "Canada needs no argument to show the situation in Manchuria is one to command her active interest."

He referred to the treaty of Washington in 1922, and the Paris peace pact, and said Canada, with the full obligation of nationhood, would have to decide for herself whether either treaty had been infringed or violated. Any trade advantage accruing to Canada through China's boycott of Japan would be more than offset by loss of trade with Japan.

A New Explosive

Drives Bullet Five Times Faster Than Sound Travel

The modern rifle bullet has a muzzle velocity of 3,000 feet a second. It strikes a tremendous blow, measured in hundreds of pounds. Now a German named Verlich has invented an explosive that will speed the bullet more than a mile a second faster, and will triple its striking power. That is more than five times faster than sound travel.

A Modern Paradise

"Well, how are you getting on now you are married?"

"It is just like Paradise."

"I am glad to hear that."

"Yes, we have nothing to wear, and are in daily fear of being turned out."

Heavy Fur Catch

Catch This Year Promises To Be Best In Past Decade

The fur catch in the north country this year promises to be one of the best in the past decade. From early reports received from the far north trappers will bring down heavy shipments of furs this spring.

The quality of the furs, a factor that varies from year to year, promises to be high, north trappers claim, because of the climatic conditions that have prevailed in the sub-Arctic regions this year.

While the catch in the more civilized portions of the province will be only average, north of Churchill and in the southern Indian Lake area the catch near the spectacular. Prices for pelts this year are only average, dealers advise, and the royalty and heavy cost of bringing them into the United States will prove a handicap to dispose this spring it is feared.

The huge Junkers' plane purchased this year by the Canadian Airways will probably bring the furs down from many of the isolated posts in the far north to Winnipeg.

Recipes For This Week

(By Betty Barclay)

HAM PIE

- 2 cups cold cooked ham, cut in half inch cubes.
- 3 potatoes.
- 1 onion.
- 1 green pepper.
- 1/2 cup celery.
- 2 tablespoons flour.
- 1 teaspoon sugar.
- Salt and pepper.
- 2 cups water.
- Rich biscuit dough.

Peel and slice potatoes and onion. Remove stem and seeds from pepper. Slice. Chop celery. Add ham, seasonings and water to vegetables. Cook all together until vegetables are tender. Stir in flour to thicken, adding more water if needed to make enough gravy to cover. Put mixture in a baking dish. Cover with a rich biscuit dough. Bake until crust is done, about twenty minutes. Serve hot.

LEMON CURD OR CHEESE

(Makes 1 pint or 3 glasses.)

- 6 eggs.
- 2 cups sugar.
- 1/2 cup lemon juice.
- 1/4 cup butter.

Beat eggs well. Add other ingredients. Cook over hot water until thick. Pour into sterilized glasses. Use for filling for tarts or cakes or as a spread for toast or hot biscuits.

Reproach Hardly Fair

People Cannot Go Back To Conditions Of Earlier Years

Mr. J. Moore's definition of "depression" — "A period during which people do not without the things their parents never had"—is neat, but the implied reproach is hardly fair. The trouble is that you cannot turn the wheel of time backwards. An individual, for example, may sell his motor car, or give up his telephone, or refuse to go to the cinema, but you cannot deprive the age of the motor car and the telephone and the cinema. Somehow these things are forced upon us by the movement of events; they are part of an inevitable growth, and to check them would be like stopping a river in its course—either futile or disastrous. After all, it would not really help matters to go back to the conditions of 1880 with the population of 1931.

Insist On Remembrance

Day Being Observed

Veterans Oppose Attempts To Drop Holiday On November Eleventh

The Associated Veterans of Canada "will oppose to the utmost" any attempt to repeal the act, which established November 11 as a public holiday, to be known as "Remembrance Day." This has been made clear to the Prime Minister, R. B. Bennett.

"The Associated Veterans view with alarm the agitation which is being carried out to secure a repeal of the act constituting November 11 a national holiday, known as 'Remembrance Day.' The memorandum says: 'They will oppose to the utmost any attempt to secure a repeal of this legislation, and invite the support of the government in maintaining the legislation as at present enacted.'"

A dietitian, we note, has been speaking of a mince pie as "a polycharbohydrate of high caloric efficiency."

Alaska produced gold worth \$9,342,000 in 1931, an increase of almost a million dollars over 1930 production.

By Annette

OH FOR THE FRESH CHARM OF SPORTS CLOTHES THAT PARIS ADORES

Here's a delightfully smart model that is carried out in two-like woolen in deep bright blue mixture, now so modish.

It gives the impression of suit styling. The collar is white pique. The bindings are in navy blue. The belt is navy blue suede.

It has so much dash.

It's such a splendid type for office or college wear.

Style No. 815 may be had in sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/4 yards of 39-inch material, 3 1/2 yards of 39-inch contrasting, 5 1/4 yards of binding and 1/4 yard of 1 1/4-inch ribbon.

Jersey is a favourite this season and adapts itself perfectly to this model.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

A Russian Giant

Machow, a Russian who was exhibited in London and Paris in 1906 is said to have been the tallest giant of whom the world has any reliable record. He stood 9 feet 3 inches and weighed 25 stone 10 pounds, or about 362 pounds.

Calendars showing maps of the world in old-fashioned style are popular in England this year.

India exported 55,000,000 pounds of tea in a recent month.

FILM DIRECTOR (referring to unsuitability of actor's clothes for scene supposed to take place in the Arctic): "You haven't got a fur coat, you say, but you've got your winter woollens on! I don't expect the audience to guess that—or would you like it put in the programmes?"—The Humorist, London, England.

Delightful Cruises

Cunard and Anchor Line Steamers Furnish Sea Voyages For Those On Holiday Bent

That the world and his wife are going to sea for their holidays more than ever before is evident in the fact that no less than fifty-six cruises have been arranged for Cunard and Anchor Lines steamers during the remainder of this winter, spring, and summer. This does not include the departure this week from New York of the "Franconia" on her annual five-month cruise of the world.

The Maritimes and the St. Lawrence will get a good share of this cruise tourist business, for twelve cruises will call at Canadian ports which will form their main attraction for thousands of New Englanders expected on these short trips from New York. Last summer the "Transylvania" made three experimental voyages to Quebec and Halifax from New York with a 60-mile cruise up the Saguenay River. She is the largest vessel ever to navigate this famous waterway, and on each voyage she was booked to capacity. This summer and fall there will be six such 12 1/2-day cruises, by this steamer and her sister ship the "California" which will then make her first appearance on the St. Lawrence. Other cruises in which Canadian ports will be featured are three six-day cruises from New York to Halifax and Bermuda on the express "Mauretania" during the summer. The Anchor liner "Caledonia" will make a 9-day cruise to Halifax, on August 27th, and on October 20th, a 10-day voyage will be made to the same port by the "Transylvania."

Several short summer cruises on express Cunarders and two Labor Day week-end cruises by the "Transylvania" and the "Bergensia," largest Cunarder, are also scheduled to call at Halifax. Elaborate arrangements for seeing Canada are being made for these passengers.

Short, inexpensive trips to the West Indies continue to be popular, their success being indicative of the price trends of today. A call at Miami has been introduced into the itinerary of eight 9-day cruises to Havana and Nassau by the "Caledonia," the visit to the Florida playgrounds of the wealthy proving a great attraction.

More leisurely visits to the West Indies will be made on three voyages of the "California," and two on the "Beythik," ranging from 12 to 23 days and visiting all the high spots in the islands as well as calls at Panama and the South American mainland.

Bermuda retains its hold on the imagination of the cruise tourist public, the "California" and the "Beythik," one of the 20,000-ton Cunarders, being listed to make Easter cruises from New York of 9 and 8 days respectively.

The device, made of brass, was perfected by a British scientist named Gibbs, Dr. Hanzik said.

Dogs, cats, rabbits and other large animals live for several hours under an anaesthetic with the mechanical heart. Its value is in enabling students and physicians to trace the flow of blood through an animal's body and to study the effects of various drugs and dyes in the blood, Dr. Hanzik explained.

It is said that 500 different kinds of material are used for the manufacture of shoes.

When all were satisfied Jesus bade His disciples gather up the broken pieces which were undistributed, that nothing be lost. Those fragments filled twelve baskets. Probably each of the twelve had a provision basket with him. The scantiness of the source, five barley loaves, is again mentioned to emphasize the greatness of the miracle.

When all were satisfied Jesus bade His disciples gather up the broken pieces which were undistributed, that nothing be lost. Those fragments filled twelve baskets. Probably each of the twelve had a provision basket with him. The scantiness of the source, five barley loaves, is again mentioned to emphasize the greatness of the miracle.

Cleaning Units Needed

To Ensure Distribution Of Clean Seed

In order to cope with the cleaning of seed grain for distribution to needy farmers this spring between 400 and 600 travelling seed cleaning machines will probably be necessary.

In addition to this, it is believed by grain men that every privately owned seed cleaning machine will have to be utilized if seed grain is to be properly cleaned in preparation for coming spring work.

Mechanical Heart Constructed By British Doctor Aids Science

Construction of a mechanical heart which maintains blood circulation in animals after the real heart has been removed, is announced at Stanford University, California, by Dr. Paul J. Hanzik, head of the pharmacology.

The device, made of brass, was perfected by a British scientist named Gibbs, Dr. Hanzik said.

Dogs, cats, rabbits and other large animals live for several hours under an anaesthetic with the mechanical heart. Its value is in enabling students and physicians to trace the flow of blood through an animal's body and to study the effects of various drugs and dyes in the blood, Dr. Hanzik explained.

SUNDAY SCHOOL LESSON
JANUARY 31

JESUS FEEDS THE MULTITUDE

Golden Text: "Jesus said unto them, I am the bread of life; he that cometh to Me shall not hunger, and he that believeth on Me shall never thirst."—John 6:35.

Lesson: John 6:31-71.

Devotional Reading: Psalm 34:3-11.

Explanations and Comments

Jesus and the Multitude, verses 1-4.—With His disciples Jesus crossed to the eastern side of the Sea of Galilee (or the Sea of Tiberias, as it was also called from the City of Tiberias which Herod Antipas had built on the western shore of the lake in honour of the Emperor Tiberias) and, climbing the hillside sat down for a quiet conference with them.

The Feeding of Philip, verses 5-7.—When Jesus saw the crowd He turned to Philip and asked him where they should go to buy bread for them. Philip was a practical man of affairs and he made a hasty calculation. Two hundred men, including the women and children, would not supply even a little for each one.

The Evangelist adds, "This He said to prove him; for He Himself knew what He would do." The difficulty of solving it, and should offer to help as the humble instrument by whom the people could be served.

The Lord's Supper, verses 8, 9.—Andrew, Peter's brother, then said that there was a lad among them who had five barley loaves and two fishes, "but what are these among so many?" he exclaimed. "The emphasis is on the word 'but'—Andrew saw the poverty of the visible supply; he failed to see the richness of the invisible supply."

The Miracle, verses 10-13.—At the direction of Jesus the people sat down on the grass about five thousand men besides the women and children, Matthew 14:21. They sat in companies of fifty, but the distribution might be quickly made. Taking the five barley loaves in His hands, Jesus offered thanks, probably repeating the customary words, "Blessed art Thou, Jehovah our God, King of the earth, who dost feed us to come forth of the earth."

Then Jesus distributed the loaves and the fish till all were abundantly satisfied.

When all were satisfied Jesus bade His disciples gather up the broken pieces which were undistributed, that nothing be lost. Those fragments filled twelve baskets. Probably each of the twelve had a provision basket with him. The scantiness of the source, five barley loaves, is again mentioned to emphasize the greatness of the miracle.

Policy Of Isolation

Dr. Nicholas Butler Criticizes the United States Attitude

The "stupidity" of the policy of national isolation was assailed at Philadelphia, Pa., by Dr. Nicholas Murray Butler, president of Columbia University, who declared the trouble with the world is that "the war is still going on."

"If this policy be pursued," he warned, "the economic and financial results will be so disastrous that present conditions will seem like an abounding prosperity."

Speaking at the annual dinner of the League of Nations Association, Dr. Butler's address climaxed a day of activity for delegates to the convention.

His plea for closer co-operation with other nations was echoed by George W.ickersham, of New York, president of the association. Mr. Wickersham, presiding at the dinner, criticized the aloofness of the United States toward the League of Nations and declared this country is in honor bound to adhere both to the league and the world court.

Trans-Atlantic Flight

Proposed Air Hop From Ireland To New York

Captain J. P. Saul, who navigated Air Commodore Charles Kingstons-Smith, across the Atlantic in June, 1930, announced recently that preliminary arrangements had been made for a flight to New York and back next May.

He will be accompanied by Col. James Fitzmaurice, who preceded him across the ocean in the "Bremer" in 1928, and will start the flight from Port Marnock, Ireland. They intend to make the return hop the day after arriving in New York.

Old Belief Explained

The only sense in which fish can be called a brain food is that it is digested easily and therefore the stomach does not make such a heavy call on the blood in the brain during the digestive processes.

Bilious For Days

At Time Until She Took Vegetable Pills

To Assist Agriculture

Quota System Between Canada and Great Britain For Canadian Wheat

Establishment of a quota system between Canada and Great Britain, for Canadian wheat, was visualized as one of the great hopes for Saskatchewan agriculture in 1932 by J. D. MacFarlane, president of the Saskatchewan Agricultural Societies Association, who presented his annual report to an executive meeting of that association at the University of Saskatchewan.

Mr. MacFarlane also said a change in the styles of obtaining credit in the countries of the world was essential to economic recovery, and he believed cancellation of war debts, to enable world buying power to improve, was necessary if 1932 was to be a better year than the past year.

Even adoption of these changes did not offer much hope for the present year, Mr. MacFarlane believed, but he thought they would tend to make next year more normal and would restore agriculture to a place more nearly approaching its old position.

Dispensing of the high rates of interest paid by one country to another would materially assist, he thought. He believed an international banking committee could render help in the situation, functioning similarly to the League of Nations, but dealing with the financial obligations and requirements of the countries of the world.

Each country, under this system, would issue its own currency, instead of borrowing in New York or London, England.

Policy Of Isolation

Dr. Nicholas Butler Criticizes the United States Attitude

The "stupidity" of the policy of national isolation was assailed at Philadelphia, Pa., by Dr. Nicholas Murray Butler, president of Columbia University, who declared the trouble with the world is that "the war is still going on."

"If this policy be pursued," he warned, "the economic and financial results will be so disastrous that present conditions will seem like an abounding prosperity."

Speaking at the annual dinner of the League of Nations Association, Dr. Butler's address climaxed a day of activity for delegates to the convention.

His plea for closer co-operation with other nations was echoed by George W.ickersham, of New York, president of the association. Mr. Wickersham, presiding at the dinner, criticized the aloofness of the United States toward the League of Nations and declared this country is in honor bound to adhere both to the league and the world court.

Trans-Atlantic Flight

Proposed Air Hop From Ireland To New York

Captain J. P. Saul, who navigated Air Commodore Charles Kingstons-Smith, across the Atlantic in June, 1930, announced recently that preliminary arrangements had been made for a flight to New York and back next May.

He will be accompanied by Col. James Fitzmaurice, who preceded him across the ocean in the "Bremer" in 1928, and will start the flight from Port Marnock, Ireland. They intend to make the return hop the day after arriving in New York.

Old Belief Explained

The only sense in which fish can be called a brain food is that it is digested easily and therefore the stomach does not make such a heavy call on the blood in the brain during the digestive processes.

Bilious For Days

At Time Until She Took Vegetable Pills

Gratefully, Mrs. C. writes: "The first dose of your wonderful Carter's Little Liver Pills gave me great relief after every medicine I tried failed."

Because they are PURELY VEGETABLE, a gentle, effective treatment for liver and bowels, Dr. Carter's Little Liver Pills are without equal for constipation, biliousness, indigestion, flatulence, poor complexion and indigestion. Ask for a 25c. box, everywhere. Ask for Carter's by NAME.

U.F.A. VOTE DOWN PROPOSAL FOR MORATORIUM

Edmonton, Alberta.—Declaration of a moratorium on debts in the Province of Alberta was rejected by the United Farmers of Alberta as a solution of their financial difficulties. After a strenuous debate the farmers' convention voted down a resolution calling on the provincial government to declare a moratorium by a vote of 99 to 95.

The slim majority for the opponents of the proposal followed more than a score of fighting speeches on either side. In rejecting the scheme, the convention endorsed a plan taken by the Premier of the Province, Hon. J. E. Brownlee, who advised against the move. Two members of the Federal Parliament also threw their weight against it, William Irvine, Wetaskiwin, and Alfred Speckman, Red Deer.

Declarations that it was a matter of life and death to the farmers, that they were unable to pay anything on their debts and had a right to protect their homes and farms from seizures were frequent during the debate. Opponents of the measure warned of the danger to the credit of individuals and the Provincial Government and claimed a moratorium was only a postponement and no solution of the defects in the existing economic system.

After rejecting the moratorium proposal, the convention passed a resolution favoring the extension of the Provincial Debt Adjustment Act to the whole province and an amendment to make the disposition of any debtor impossible without recourse to the act. Terms of the act were explained by P. H. Wedderburn, administrator for the Edmonton district.

Following a suggestion that if tax payments ceased schools would have to close up and provincial government services could not be carried on, the sponsors of the moratorium modified their resolution to exclude taxes and it was in this form it was voted down.

While opposing a moratorium the convention, nevertheless declared for a drastic reduction or cancellation of interest charges on existing debts.

Strong opposition to the transfer of the work of the Alberta provincial police to the Royal Canadian Mounted Police was voiced when a resolution from Calgary local came up.

Opposed To Delay In Wheat Grading

Alberta Farmers Want Garnet Wheat Graded At Once

Edmonton, Alberta.—No delay in the creation of separate grades for Garnet wheat is desired by the United Farmers of Alberta. Their convention voted down a motion to ask the Dominion Government to postpone the setting up of new grades for at least a year.

Garnet wheat is extensively grown in the northern part of the province. Growers regarded the creation of separate grades as inevitable and thought the farmers would lose nothing by getting this variety of wheat established at its actual value as a separate grade, although the immediate effect of separate grading might cause Garnet to sell at a lower price for a time.

Claims Copyright Infringement

Damages Asked For Use Of Photograph Of Prince Of Wales On Two Dollar Bills

Toronto, Ont.—Damages for the use of copyrighted photograph of the Prince of Wales on Dominion of Canada two-dollar bills are being sought by George P. Freedland, local photographer, in an action started against the Canadian Bank Note company, Ottawa.

Mr. Freedland claims that during the visit of the Prince in 1919, he took a number of photographs of his royal highness and copyrighted them. The pictures, he says, were later used on a two-dollar bill.

Attempting New Speed Record

London, Eng.—Sir Malcolm Campbell, British racing driver, who was invited by Mayor Edward H. Armstrong, of Daytona Beach, Fla., to attempt to beat his own speed record of 245 miles an hour, said he expects to be there February 10 or February 12 to make the attempt.

W. N. U. 1926

'Plane Makes First Trip

Giant Liner Inaugurates Weekly Air-mail Service To Cape Town
London, Eng.—Promptly on schedule time, the giant Imperial Airways' liner "Helen" took off from Croydon aerodrome Jan. 30, inaugurating a weekly air-mail service to Cape Town.

The plane carried 20,000 letters and 160 parcels, including a large box of eggs. The passengers were Air Vice-Marshal Sir Vyell Vyvyan, Lady Vyvyan and F. G. L. Bertman, Deputy Minister of Civil Aviation.

The London-Cape Town route follows established routes as far as Egypt and then plunges south down the "dark continent" travelling a route worked out first by machines of the Royal Air Force, which did the pioneer work only a few years ago.

Suggests Bonus For Buyer

Proposal Would Benefit Coal Purchaser Instead Of Mine Operator

Calgary, Alberta.—Any step towards improvement in the Canadian coal industry must be the approval of Alberta operators, it was declared by officials commenting on a proposal for a government bonus to the purchaser of coal instead of the mine operator, H. J. Kelly, manager of the Dominion Steel and Coal Corporation, in Sydney, N.S., suggested the government pay a bonus, not to the mine operator, but to the purchaser of Nova Scotia coal.

"At present the subvention from the government benefits the railways, not the purchaser," declared P. R. Shields, manager of Coal Sellers Company, Limited. "Any subvention should result in a lower price to the consumer in order to be of any advantage to the industry."

Offered Fellowship

Fellowship In Royal Geographical Society Awarded To Western Aviator

Edmonton, Alberta.—A fellowship in the Royal Geographical Society has been awarded to Pilot Walter E. Gilbert, Canadian Airways, Limited, as a reward for his service in the air. Such an award to an aviator is believed to be unusual.

Pilot Gilbert flies Canadian Airways, Limited, "machines from Edmonton to the Arctic Coast, and was associated with Major Burslem on the latter's trip to King William Land and the north magnetic pole in the fall of 1930. He piloted the aeroplane C-245K on that occasion. This machine, known for steady service and which has been flown steadily by Gilbert for more than a year, is almost as well known as its master.

Cathedral Is Being Turned Into Museum

Soviets Will Use It For Anti-Religious Exhibits

Leningrad, U.S.S.R.—The Soviet government has announced that the Kazan cathedral here would be converted into the largest anti-religious museum in the Soviet Union.

When completed, the museum would contain exhibits of the objects of a religious nature, interpreted along the lines of the late Karl Marx's doctrine, adopted by Soviet Russia, that "religion is opium for the people."

The Kazan cathedral was started in 1501 and completed in 1811 at a cost of approximately \$2,000,000.

Value Overestimated

Furs On Baychimo Not Worth Over Thirty Thousand

Winnipeg, Man.—"Ridiculous" was the expression voiced by officials of the Hudson Bay Company in regard to report that the missing fur-trade vessel "Baychimo," lost in the Arctic Circle carried fur pelts valued at \$1,500,000. Officials stated that the total value of pelts on board would not exceed \$30,000. A quantity of pelts had been saved before the vessel disappeared they said.

Wheat Quota Workable

London, Eng.—The government's revised wheat quota scheme, giving domestic farmers a fixed proportion of the British market is, so far as it goes, more workable than the original proposal, the National Union of Farmers was told at the annual meeting recently by a member who had been one of the negotiators with the government over the plan.

President Of U.F.A.

Robert Gardiner Unanimously Chosen To Lead Organization For Second Term

Edmonton, Alberta.—Robert Gardiner was unanimously chosen president of the United Farmers of Alberta for a second term at the annual convention here.

The veteran farm leader, who represents Acadia in the House of Commons and is a leader of the United Farmers of Alberta group in Dominion politics, was given an ovation when no other nominations were offered.

Mr. Gardiner notified the members they had better look around for another president for 1933. He said he found the burden of carrying the two posts of leader of the group in the House of Commons and president of the association too heavy.

Norman F. Priestly, Calgary, was elected vice-president by acclamation. A. F. Allen, Battle River, was also nominated, but withdrew in favor of a renewal of Mr. Priestly's term of office.

BOYCOTT AGAINST BRITISH GOODS WEAPON IN INDIA

Bombay, India.—The merchants' organization, comprising representatives of markets and exchanges that have been closed for 10 days, laid plans for a mass meeting to protest the arrest of Mahatma Gandhi, Nationalist leader, and ordinances directed against the Nationalist civil disobedience campaign.

Statistics from "authoritative sources" were published purporting to reveal the effect of the Nationalist boycott against British goods. They show Japan has shipped nearly 15,000,000 yards of cloth to India in one month, compared with less than 3,000,000 yards shipped by England and Great Britain during the same period.

Two 16-year-old girl students from the University of Bengal went to trial before a special tribunal in Calcutta, charged with the murder of Magistrate C. G. B. Stevens who was shot to death a month ago. Both pleaded not guilty.

A British police sergeant was stabbed in the head at Dacca by an unidentified assailant who stole his revolver and fled. Two suspects were arrested. When a crowd attempted to seize several prisoners in Gorkhah police fired two rounds of buckshot without wounding anyone.

Sen Gupta, former mayor of Calcutta, and a prominent Nationalist, was arrested as he stepped off an Italian ship. No specific charge was lodged against him.

Rev. H. V. H. Elvin, a young missionary, who accused authorities in the northwest frontier provinces of oppression, cruelty and "things that ought to make an Englishman ashamed," said he had been arrested and deported from that area. He blamed special officers for the alleged outrages and paid tribute to the British police force, describing its members as real friends of the people.

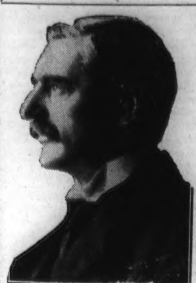

It is now possible to select certain sounds for transmission by wireless while other noises from the same sources are suppressed.

TRAGEDY OF SINO-JAPANESE WAR

Rather than be a source of worry to her soldier-husband as he departed for the battle-front in Manchuria, Mrs. Kiyochi Inoue (left), 21-year-old wife of Lieutenant Inoue (right), of the Japanese aviator, calmly attired herself in her best clothes and stabbed herself in the throat with a dagger her husband treasured. She left a note for her husband, in which she explained the reason for her suicide, and enclosed 40 yen (about \$20), with the request that he spend the money to make his soldiers happy. Her home was in Osaka, Japan.

WAR DEBT ADJUSTMENT

Right Hon. Neville Chamberlain, Chancellor of the Exchequer, who will attend Reparations Conference.

Aviators Stranded In China

Fliers From Canada and U.S. Cannot Get Jobs

Shanghai, China.—Five Canadian aviators and five from United States, who came to China expecting to be given jobs at \$1,000 a month piloting Chinese military aeroplanes, found themselves stranded here.

The aviators said they were promised by Chinese organizations in Canada, the United States and the aviation bureau of the Chinese Ministry of War was seeking pilots and would pay the salary mentioned for competent men.

The aviators landed here with practically no money only to be told the government bureau is not looking for pilots at all.

The five pilots from the United States said posters appeared at numerous Pacific coast airports advertising for pilots.

Dr. Philip Chu, Chinese physician at Vancouver, the Canadians said, is president of the Chinese society there and was directing the enlistment of Canadian fliers.

The aviators said they understood more Canadian and United States pilots are coming to China as a result of the promises. The trade commissioners communicated with their respective governments, hoping to forestall the coming of others.

Railways and Truck Competition

Suggestion Made That Railways Must Eventually Co-Operate With Bus Operators

Toronto, Ont.—Further co-operation of railways with bus and truck operators was urged by Hon. Leopold Macaulay, Ontario Minister of Highways, here. Co-operation of provincial and Dominion Governments to this end is essential, he said.

"Railways themselves are partly to blame," said Mr. Macaulay, "if truck and bus traffic is making inroads upon the business of the steam transportation systems." "Advisability of co-ordinating the two Canadian railway systems and all phases of transportation would become increasingly evident as time went on, he believed.

"I am looking forward to some suggestions from the royal commission on transportation as to means where by the railways may co-ordinate truck and bus traffic with their own operations," he declared.

No Franchise For Women

Bill Introduced In Quebec Legislature Is Defeated

Quebec, Que.—Attempt of the women of the province of Quebec to secure votes in provincial elections failed again in the legislative assembly.

The Women's Franchise Bill, sponsored by Dr. Anatole Piatte (Lib. Mercier), went down to defeat by a vote of 55 to 38 on an amendment moved by Arthur Belanger (Lib. Leves), seconded by J. P. Giguere (Lib. Dorchester), giving the bill a six-months' halt.

RADICAL CHANGE IN MONETARY SYSTEM IS URGED

Edmonton, Alberta.—In a smashing frontal attack on the existing financial system the United Farmers of Alberta, in convention here, condemned the gold standard, called for the complete nationalization of the monetary system and the extension of credit to industry on a basis of cost, not of profit.

The farmers, refused, however, to declare themselves in favor of nationalization of all the banks. They thought, with a national credit system, the banks would either not be needed or would have to render as good service as the national system.

The resolution passed was "Resolved that we, the delegates of the U.F.A., in convention, do endorse the complete nationalization of the monetary system to advance credit on a basis of cost, not on a basis of profit."

Coincident with the demand for a national credit system came a proposal for intensified political action to bring this about. A resolution call for this was defeated only on the ground that the United Farmer members in the Federal Parliament had done all possible.

Complaint was made that the United Farmers of Government of Alberta and the farmers members of the legislature had not taken the strong stand on the question which had been taken by the Federal members. The convention called on the Provincial Government and all officers and members of the association to proclaim publicly their belief that monetary reform was the only way out of the depression and so give moral support to the members at Ottawa.

This applied a censure on the Provincial Government, said William Irvine, M.P., of Wetaskiwin. The matter was one for the Dominion Government alone and the Provincial Government had to work under the present system and borrow money from the banks.

"It will soon be apparent that every provincial government in Canada is at the beck and call of the financial interests in Wall Street," said Mr. Irvine. This, he thought, might be good propaganda for the cause of monetary reform.

Farmers should unite with industrial workers to secure political power and so change the system, said Karl Axelsson. There was nothing wrong with the Bank Act except it was in the hands of the wrong people. The producing classes should wrest control from the vested financial powers.

"As the convention passed a resolution calling for the abandonment of the gold standard, Henry Spencer, member of parliament for Battle River, said Canada had already gone off the gold standard although the government did not admit it.

Deflation of currency was also favored as a means of increasing the sale of farm products. The suggestion that instead of borrowing money and paying interest "to the great financial powers" for unemployment relief works, the government should issue new paper money, was endorsed.

Amendment of the Bank Act to provide a penalty for any bank or bank official charging higher interest than seven per cent. was asked. This was a reiteration of the demand made in the House of Commons last year by Mr. Spencer.

Another resolution passed called upon the government to make wheat certificates legal tender. It would enable a farmer to take the receipts for wheat delivered to an elevator and use them to make purchases.

The Canadian tariff system was denounced and a resolution declared the time had come for an "all round reduction in our customs duties to the intent that within a period of not less than five years every feature of this barbaric economic superstitution be eliminated from the fiscal policy of our country."

DEBT PARLEY IS EXPECTED TO BE HELD LATER

London, Eng.—The British Government's announcement that Lausanne Reparations Conference will be postponed does not mean that the conference has been abandoned, it was said in official circles.

Preliminary work for the meeting is being continued, a competent spokesman said, and the government hopes that the conference ultimately will be held and will prove to be successful.

No one in official quarters took seriously what one of the London newspapers described as a "new" plan to solve the reparations problem by allowing Germany to meet her obligations with railroad bonds instead of cash.

According to the published version of this report, the cabinet had given "sympathetic consideration" to the plan, but this was denied.

It was rumored that Prime Minister Ramsay MacDonald had been forced by the pressure of domestic affairs to decline with regret an invitation from Premier Laval of France for a discussion of mutual problems over the week-end.

Canadian System Is Practical For States

Favorable Report Given By Experts Sent To Study Sales Tax

Washington.—Two experts sent to Canada by the United States treasury department to study the manufacturers' sales tax in the Dominion, told the House of Representatives Ways and Means Committee the Canadian sales tax system was practical for the United States and would bring large federal revenue.

Dr. Thomas S. Adams of New Haven, Conn., professor of political economy at Yale University, said he had found no opposition to the tax, that it was successful, well-administered and netted about \$44,000,000 annually to Canada.

Scholarships For Argentina Students

Will Provide Same Facilities As Given Rhodes Scholars

London, England.—The Prince of Wales announced the establishment of a scholarship for Argentina students at Oxford University at a dinner of the Argentina Chamber of Commerce here.

The prince said the scholarship would provide the same facilities as were given to Rhodes scholars from the United States. It would be extended to two students from the University of Buenos Aires annually for at least three years. Each student would stay at Oxford for two years.

More Air Mail Business

Post Office Officials Report Increase In Prairie Provinces

Ottawa, Ont.—Air mail business in the prairie provinces has increased, post office officials declared, commenting on a despatch from Edmonton, Alberta, which said the U.F.A. convention had passed a resolution urging the abandonment of unprofitable services.

Departmental officials are busy on the estimates for next fiscal year, and the air mail will receive attention among other branches of post office activity. It could not be learned whether the appropriation for this will be increased or cut.

Athabasca By-Election

Polling Day Set For March 21, With Nominations March 7

Ottawa, Ont.—The Athabasca by-election, necessitated by the death of John F. Buckley, Liberal, will be held March 21, it was announced by the chief electoral officer. March 7 will be nomination day.

The writ for the election was issued late Thursday, Jan. 21. P. W. I. Clarke, of Athabasca, has been appointed returning officer. Mr. Buckley was killed in an automobile accident some time ago.

Close Northern Radio Station

Prince Albert—Wankarem and Ladder Lake radio stations have been closed for the remainder of the winter, the operators passing through here recently on route for Winnipeg. La Ronge is the only station in northern Saskatchewan now open, but it is believed the others will be reopened in the spring.

Favorable Trade Balance

Canadian Exports Are Now Ten Million Over Imports

Canada has now overtaken her previous unfavorable balance of trade for the present fiscal year and has converted it into a favorable balance, amounting in value to \$10,744,995, according to a report issued by the Department of National Revenue. For several months back this country has been showing an excess of exports over imports, and the cumulative effect of this has been to offset the unfavorable balances in the early months of the current fiscal year.

Exports for the nine months had a value of \$461,797,241, while imports into Canada were valued at \$451,052,246. At this time last year the country's trade registered an unfavorable balance amounting to \$7,753,510.

During December exports of Canadian produce amounted in value to \$53,255,476, as against \$66,819,668 for December, 1930, while imports were \$40,286,055, a decline of \$20,050,999 from the same month a year ago.

Outlook Of A Feminist

Says Man Destroyed the Home a Past Generation Knew

Man himself destroyed the home a past generation knew by the invention, use and constant expansion of possibilities of machinery. Then when woman, laboring in the world of business and professions, reached a salary comparable to that of man she became a menace and he invented the old platitudinous "woman's place is in the home." This opinion was expressed at Montreal by Mrs. Beatrice Forbes-Robertson Hale, noted feminist, actress and lecturer, speaking at the People's Forum.

Before the invention of machinery, said Mrs. Hale, a wife and children were assets and not liabilities. Today, however, the wife was an economic liability, unless she worked outside the home, a course to which she was driven for lack of work in her home. There was nothing new in the fact that a woman worked, said the speaker, the departure came when she began to earn money.

Mrs. Hale urged those who were the "homemaker type" to find a husband and "settle down" but advised others "to go out and earn your living."

Has Faith in Dominion

Canadians Are Justified in Looking To the Future With Confidence

"Canada is in a relatively satisfactory position and we are justified in looking to the future with confidence," Sir Herbert Holt, president of the Royal Bank of Canada, told directors and shareholders of the bank at the annual meeting in Montreal.

"I have witnessed many depressions during the course of the last 50 years and I see nothing in this one which weakens my faith in this country," Sir Herbert continued.

"It has been said that it is darkest just before dawn, and in previous depressions conditions have seemed most discouraging at a time when improvement had already set in. The violence of the depression must of itself tend to produce a strong reaction."

Empire Development

British Government Preparing For Imperial Negotiations At Ottawa

Sir Philip Cunliffe-Lister, Secretary of States for Colonies, told an audience in London, England, that the empire development of the past must give place to settled development based on market requirements.

"The government is preparing for imperial negotiations at Ottawa determined to succeed," he said. "The dominions and colonies, he added, had given evidence of great goodwill towards the Mother Country which Great Britain had already set in. The dominions and colonies, he added, had given evidence of great goodwill towards the Mother Country which Great Britain had already set in. The dominions and colonies, he added, had given evidence of great goodwill towards the Mother Country which Great Britain had already set in."

"There is only one objection to this wireless, we can't sleep in office hours."—Jugend, Munich.

W. N. U. 1936

Ostrich Is Long-Lived

And Oldest Birds Have the Most Beautiful Plumage

Just 45 years ago the first shipment of ostriches was brought from Africa to California, marking the introduction of ostrich farming in the United States. There were 42 birds in that original flock and more than three months were required for the long voyage.

Because of the prevailing high duty of ostriches, subsequent shipments were prohibited, or reduced to a few scattered pairs, so that practically all of the ostriches now found in this country are the descendants of the original 42. These were brought to America by Cawston and Cockburn for the pioneer Cawston ostrich farms of South Pasadena and Norwalk, California.

The South Pasadena farm is still in existence, and several of the majestic birds that made the long trip from Africa 42 years ago are still producing beautiful plumes.

The older the ostrich, the lovelier its plumage. Hence, the veterans of the flock, 30 or 40 years of age, yield the finest feathers. A full-grown ostrich weighs about 275 pounds, and stands nearly eight feet high. All ostriches are a brownish color until eighteen months old, when the cock turns black and the hens gray.

Just how fast an ostrich grows can be estimated when it is stated that a young bird reaches maturity in six months—almost two pounds a day! Height is attained at the same remarkable rate, or about a foot every four weeks. The average span of an ostrich is 70 years.

Why Fat People Are Fat

Take More Food Than They Expend in Muscular Work

Dr. Louis H. Newburgh, professor of clinical investigation at University of Michigan, declared that fat persons are fat simply because they eat too much. He contradicts the time-honored belief that obesity is caused by diseases or maladjustment.

Dr. Newburgh made closely controlled observations of fat persons in University Hospital over a period of years and measured accurately the amount of food eaten by patients and its value in energy. He found that weight gains followed the taking of more energy than was expended in muscular work.

Dr. Newburgh claims that obese patients regularly deceive themselves and their physicians by "cheating" in their dieting. He said the "easy-going fat man" often was in reality not "easy-going" but an extremely nervous individual who found constant eating a relief from nervous distraction.

Some of the answers were as follows:

- Because they are thinner now than they used to be.
- Because they have food-faded tastes.
- Because they are easy to read.
- Because they are well worth looking over.
- Because back numbers are not much in demand.
- Because they are not afraid to speak their minds.
- Because they have a great deal of influence.
- Because if they know anything they usually tell it.
- The correct answer was given as this: Because every man should have one of his own and not run after his neighbor's. — Regina Leader-Post (Evening).

Have One Yourself

Every Man Should Buy His Own Newspaper

Recently The Leader, published at Fort Meade, Florida, offered a prize for the best answer to the question: "Why is a newspaper like a woman?"

Some of the answers were as follows:

Because they are thinner now than they used to be.

Because they have food-faded tastes.

Because they are easy to read.

Because they are well worth looking over.

Because back numbers are not much in demand.

Because they are not afraid to speak their minds.

Because they have a great deal of influence.

Because if they know anything they usually tell it.

The correct answer was given as this: Because every man should have one of his own and not run after his neighbor's. — Regina Leader-Post (Evening).

A Short Night

It was Willie's first ride in a railway train, and the succession of wonders reduced him to a state of continuous astonishment. The train rounded a slight bend and with a shriek of its whistle, plunged into a tunnel.

There were gasps of surprise from the corner where Willie was. Suddenly the train rushed into broad daylight again, and a small voice was lifted in wonder.

"It's tomorrow!" exclaimed the small boy.

Large Livestock Holdings

Canada's Indian wards on reserves in the prairie provinces of Manitoba, Saskatchewan and Alberta had in 1930 a total of 22,888 head of cattle of all classes according to figures of the Department of Indian Affairs.

Rust is estimated to cost the world more than five billion dollars a year.

Medical Terminology

Movement in United States To Simplify Names Of Diseases

The reclassification of the diseases and ailments of the human body according to cause and organ affected, with a strongly pronounced preference for English nomenclature, undertaken by the National Conference on Nomenclature of Diseases recently held at the New York Academy of Medicine, is a project which can scarcely fail to commend itself alike to medical authorities and the public, whose health is in their keeping. The list, which is to be printed by the United States Public Health Service, within the next two months, will constitute an entirely new catalogue of diagnostic titles, according to Dr. H. Burton Locke, executive secretary of the conference, in which "English terms in good English usage are to be employed whenever possible."

Long shrouded in a complex Latinate jargon, the practice of what has frequently enough been simple therapeutic or surgical technique has for ages been shrouded in its bewildering aspects of a profound art and mystery. It is probable that in the new list numerous Latin and Greek terms will continue in use in the diagnosis of eye and skin diseases, but here they are, from long accustomed usage, familiar, and in most other cases English terms will be preferred. In general a simplicity of language will obtain, and it is hard to believe that such a practice can be anything but reassuringly healthful in its tendencies and result.

As with the modern psychologists, who, rather than say a person is "shy," assert that he is the victim of "an uncompensated inferiority complex," so for centuries physicians and surgeons have expressed the ailing with portentous diagnoses couched in ominous polysyllables. In a time when, as a result of better health education, medicine and its practice are better appreciated and understood by laymen than ever before, a clarifying simplicity of medical terminology is a project which should find wide public favor. — New York Herald-Tribune.

London Housing Plan

Ten Year Home Building Project Relieves Congestion

Thousands of residents of London, Eng., have joined the exodus to occupy new homes in the country several miles out of the great and overcrowded city.

London has been carrying on a 10-year home building project. It is the biggest house building organization in the world and London is also the big, at landlord.

London has cleared up many slum districts and has relieved congestion in many overcrowded areas. Where it has knocked down slums it has built large blocks of modern flats to house the people displaced.

All round the outer fringes of London there have sprung up little towns and large villages. At Becontree and Dagenham, where the new Ford plant is getting into its stride, 21,352 new homes have been built, providing for 95,000 persons. At Dagenham 6,071 homes have been completed; at Walling, 4,021; at St. Heller, 3,458; Bellingham, 2,103; Roehampton, 1,212 houses. There are 39 separate schemes for house building and 46,209 homes have already been built and flats to house 52,128 have also been erected.

A further 3,387 dwellings are under construction at present and the total expenditure to date on the London housing scheme is \$183,901,000.

The fire department of Brussels, Belgium, has just added a fire escape which can be extended 130 feet.

BONZO

Here is the latest photograph of Mrs. K. Gandhi, wife of Mahatma Gandhi, who was arrested shortly after her husband was jailed at Poona.

Improving On Nature

Writer Moralizes On Discovery Made By Curator Of Botanical Gardens

Occasionally the hand of improvement becomes perversely meddling. It essays to make better what is perfect; it eliminates some cherished peculiarity because it is not utilitarian, but serves only the purpose of interest or beauty. An illustration comes from the botanical gardens in Cambridge, England.

The curator, after much patient experimenting, it is reported, has produced a straight banana. Under mathematical test the elongated fruit is said to display not even the slightest hint of a curve. What of it? Can a straight banana be more delectable to taste than one which has been gently bent by nature's fingers? It cannot be more enticing to look at. Perhaps its conformity to the shortest distance between two points makes it more easily cratable, but that is to be doubted.

What does England know about bananas, anyway, that her horticulturists should take liberties with beauty? Bananas are an American joy and beauty—and the more lovely because their yellow length is cradled seductively. There is nothing seductive in a straight line. Ask the moralists. The proper retort to the curator of the Cambridge botanical gardens is, "Yes, you have no bananas!" — Chicago Daily News.

The Gulf Stream

Has Not Changed Its Course, As Some Statements Made It Appear

As if there were not enough things to worry about already, another attempt is making to convince mankind that the Gulf Stream has changed its course. This is a subject on which the defenders of the past can afford to be dogmatic. The Gulf Stream is a conservative; ages ago it made its bed and it is content to lie in it. Though the Bank of England might sell gold, though Gibraltar lose its impregnability, the Gulf Stream keeps to its course, undisturbed by the accusation of inconstancy little men bring against it. — New York Sun.

Safety First

MacPinch—"Yes, my daughter has eloped."

Magruder—"But I suppose you will forgive the young couple."

MacPinch—"Not until after they have located a place to board."

Nicholas Murray Butler would abolish the word "war." War would thereafter be described as "what used to be described as war."

Improve Quality Of Maple Sugar and Honey

Far-Reaching Discoveries Of National Research Council Are Announced

Maple syrup differs to twenty times as strong in flavor, and honey that will not spoil through fermentation, are now practical achievements according to an announcement by the National Research Council. Scientists have been working on these subjects for some time and the improvement desired in the maple sugar and syrup industry has been attained, the announcement stated, while the means of measuring the water content of honey and thereby providing a measure of protection against spoilage, is being worked out satisfactorily.

These discoveries are expected to prove of considerable value as the annual production of maple sugar and syrup in Canada is normally worth about six million dollars, while about thirty million pounds of honey is an average yearly output.

Although a popular delicacy the great bulk of maple product exported is used in the manufacture of tobacco in the United States. One feature prejudicing the greater use of the maple sugar as a food has been the fact that the cakes of sugar become hard and stiff after a short time. A discovery by L. Skazin, a member of the staff of the National Research Laboratories, formerly of MacDonald College, now makes it possible to prevent this deterioration.

Mr. Skazin's discovery also enables the manufacture of a syrup fifteen to twenty times stronger in maple flavor as heretofore, and of concentrates of the pure flavor for use in various manufactures in which heretofore the winter of maple was not available. This is expected to be of special interest to ice cream and confectionery manufacturers.

The presence of excessive moisture in honey, resulting in early fermentation, prompted the research council to seek a means of combating this evil. Dr. H. D. Chatway of the research laboratories, after a year's work, has succeeded in working out suitable methods of measuring this moisture.

Dr. Chatway's discovery will aid in the avoidance of loss by fermentation and will also enable the honey dealers to offer the product with a guaranteed sugar content.

Other problems relating to honey, on which work is being done in the laboratories with every promise of success, the announcement stated, are connected with buckwheat honey which it is shown can be converted into a high-grade honey by appropriate treatment, and the development of new honey products which it is hoped will help to extend the market.

Movement Of Ice-Floes

Higher Than Normal Temperature In North Atlantic May Effect Change

Higher-than-normal temperatures in the North Atlantic shipping-lanes this winter may affect the movement of ice-floes, but the Dominion meteorological bureau is unable to say in what way. It is too early, according to officials to make deductions from observations necessarily limited in scope.

Reports from Resolution Island, at the confluence of Hudson and Davis Straits, down which move icebergs from the west and north, indicate open water to the south and east, and ice to the north and west. The Resolution base reports four "growlers" or grounded bergs, to the south at the mouth of Hudson Straits.

Temperatures in north-east Canada and Greenland, while higher than normal, closely parallel those of last year at this time, officials state, as reported across the north Atlantic from southern Greenland to the British Isles.

Regarded Letter With Awe

In her invigorating story of "Mere Marie of the Ursulines," Agnes Repplier has the "puzzled awe" with which the Indians regarded a letter. "They would carry one from Quebec to a remote village, and listen 'in ecstasy' when it was read aloud to them, and they recognized the accuracy of the news. They could not understand how a scrap of paper could tell so many things and never be mistaken!"

Still Hope For Peace

We still cling to the ideals of peace, the League has not abdicated, reparations are still subject to negotiation, the disarmament conference has not been abandoned, but there have been many observers of the European scene who have declared that beneath this facade of international co-operation the old forces of militarism are at work and who have questioned whether Europe can really keep the peace. — New York Evening Post.

Swine Illness In Winter

Caused by Damp Sleeping Quarters and Lack Of Sunshine

The crippling of swine is usually an observation of rickets or osteoporosis, or both, but one cannot always diagnose crippling as the result of dietary deficiency or a lack of mineral nutrition. The condition is practically unknown among swine running outside in summer and is almost as rare in winter in the Prairie Provinces among swine sleeping in a straw pile or in a straw shed well provided with bedding. On the other hand, crippling is common among hogs wintered in lumber buildings or in barns with other kinds of stock. These facts indicate definitely that sunshine and dry sleeping quarters are conducive to good health in swine. Crippling is frequently traceable to damp sleeping quarters, constipation and lack of sunshine and minerals.

At the Dominion Experimental Station, Scott, Sask., crippling has never been observed in swine provided with dry, comfortable beds in straw shelters and fed some distance from the sleeping quarters. Serious crippling has often resulted from compelling pigs to sleep in lumber cabins banked with straw and manure, or in a well constructed lumber building known as the pigery. It has also been observed that in case of fall pigs, those born before September 15, and allowed to run outside, seldom crippled during the winter, but many good gains and remained healthy, sometimes under adverse conditions. Pigs born later in the fall have not the same chance to become well grown and thus are not so prepared to withstand the rigors of winter, and during the winter, there is nothing to fully replace sunshine in preventing crippling, but cod liver oil, pichard oil, and ground limestone have been used by different investigators with a certain degree of success.

Need Change Of Heart

World Must Begin Anew On Some Common Ground

The fact that there has been an undue concentration of gold in some countries to the exclusion of others is not the fault of the gold standard, but it is because the world is pursuing policies which have this as their inevitable result. It is folly to suppose the outcome would be different under any other standard. The necessity for huge "unilateral" payments on international debts, the innumerable obstructions placed upon international trade, and the political discord and jealousy existing between nations are the real sources of difficulty.

What the world needs is a change of heart, and to learn something of the "facility of association" of which Barrow spoke. The world must begin anew on some common ground—something that gives hope and faith and encouragement for the future, rather than a mere repetition of accusations and suspicions.—Monthly Report of the National City Bank of New York.

Did Not Worry Him

Two suburban districts in London, England, bear the names Hampstead and Islington. They adjoin and the same railway bus goes into each suburb. The conductor was announcing the arrival at the first of these two places by shouting "Amstead, Amstead."

"Pardon me," said a passenger, as he was getting off the bus. "Conductor, you've dropped something—the 'H' in Hampstead."

"That's half right, sir," came the cheerful rejoinder, "H'll pick it up at Islington."

All-metal bungalows made of steel and copper have been developed in Germany to sell for about \$1,000 exclusive of plumbing and other equipment.

A novel musical instrument that combines a small piano and radio set has been placed on the market.

"If you like it I will buy it for you."

"No, I don't like it—but wa't a minute. I have nearly finished it."—Buen Humor, Madrid.

CURLING

Two rinks of local curlers paid a return visit to High River on Saturday and played four friendly games, splitting even, winning two and dropping two games. The boys were right royally entertained and all report a good time.

The following curlers made the trip: Ed. Meyers, Glen Williams, Lloyd McRory, Hall McCaskill, Ivor Lewis, Adam Cruickshank, C. H. McMillan, R. T. Amery, Chas. Purvis, and Archie McFadyen.

Four rinks of local curlers, skipped by L. McRory, G. Purvis, R. Smart and H. McCaskill, are taking part in the Carstairs bonspiel which started this morning. Purvis won his first game by giving Hyslop an awful drubbing, the score was 16-0 at the end of eighth end when the Carstairs gang called it a day, McRory also chalked up a win when he put Donahue out of the Distributors by a score of 12 to 10.

With sixteen rinks entered it is not likely that thespiel will be wound-up until Saturday.

HOCKEY

The Crossfield hockey team lost another game to Airdrie on Tuesday night. The local squad passed up several chances to score. As for speed Crossfield skated Airdrie clean off their feet, at no time during the game could the Airdrie boys match strides with the locals.

The score was 3-2 in favor of Airdrie and was another gift to a slower team who won out by playing a little combination.

Airdrie—McDowell; Clayton and Hatt; Tees, Borbrige and Davis Klein, Fletcher and Soper. Crossfield—Stanifer; Murdoch and Smart; Stevens, Young and Miller; anha. R. McFadyen, L. Nichol.

The hockey team are holding a basket concert and dance in the U. F. A. Hall on Tuesday, February 9th. Music by the Melody Boys. Admission: Gent's 50c, ladies please bring baskets. To gent's buying baskets admission charge will be refunded.

Special Dispatch to the Chronicle

Crossfield's junior hockey team descended on Don Fraser's Junior Maroons, Tuxis Team of North Hill United Church in Calgary, on Saturday, and retreated, re-enters of a 3-1 defeat.

The Crossfield lads were playing fast hockey and gallantly holding their end until Ken Gilchrist, spectacular Crossfield net-minder, sustained severe injuries to the nose and had to leave the field of battle.

With ratepayers meetings being held throughout the district it might not be a bad idea to consider the most important point, and that is the election of Councillors. In times like these the ratepayers should get together and be sure of getting the best brains possible, men of integrity, clear vision, and men that cannot be stampeded.

A party in the form of a surprise was held at the home of Mr. and Mrs. R. M. McCool on Wednesday. The evening was spent in cards. Owing to lack of space we are unable to give more details.

Next Sunday evening at the United Church at the regular service, the Sunday school prizes will be presented. It is urged that as many as possible, especially of the parents, be present. Special music.

Subject of Address—"Should we think more about heaven and the after life?"

The Burns' dance held in the Beaverdam hall on Friday night last was a decided success. Music for the dance was supplied by J. and R. Williamson, John Jack, Kenneth Cameron "Shorty" Jackson and pipers Wm. Russell, Duncan Cameron and Geo. Leask, Jr.

As added attraction, that brought a great deal of applause from the large gathering was the dancing of the Highland Fling, Sailors Horn Pipe and Shean Truibhas by Miss Cathie Kemp of Calgary.

The ladies served an excellent lunch at mid-night, after which dancing was kept up until 3 a. m.

THURSDAY, JAN 28th, 1932

Pay your subscription, we knead the dough. Thank you, Robt. Ure left today on a business trip to Ottawa, Ont.

A. A. Halliday spent the first of the week in Edmonton. Mr. and Mrs. R. M. McCool spent Monday in Calgary.

Mrs. Cruickshank and Florence accompanied the curlers to High River on Saturday.

Mrs. P. C. Conrad of Calgary is visiting at the home of Mr. and Mrs. H. Ballam.

Mr. and Mrs. Wm. Wood and Mrs. A. Heywood were Calgary visitors on Tuesday.

The Misses Myrtle Metheral and Kathleen Mair were visitors in Calgary on Wednesday.

Mrs. J. McNicol motored out to home of her son Frank this week, making other calls as well.

Mr. and Mrs. N. A. Johnson and Mrs. Belshaw, were visitors in Calgary on Tuesday.

Don't forget the annual meeting of the School Fair on Saturday, January 30th at 3 p.m.

R. M. McCool delivered an address at the U. F. A. meeting at Edmonton on Wednesday night.

Postmaster Mossop who was laid up laid last week with an attack of the gripe was able to resume his duties on Monday.

Mrs. J. Morrison who has been visiting in Scotland for the past three months is expected home today (Thursday.)

The Guild will meet at the home of Mrs. S. H. McClelland on February 4th.

The regular monthly meeting of the Ladies Aid of the United Church will be held on Wed. Feb. 3rd, at the home of Mrs. R. T. Amery.

Miss Grant who has been conducting a beauty parlor in the Johnson barber shop has gone out of business and left for her home in Calgary on Monday.

Mrs. M. Clay of Calgary will be in Crossfield on Monday and Tuesday; Feb. 1 and 2. to do marcelling. Appointments can be made at the Chronicle office.

Thos. Mair, L. Overby and W. Miller were in Calgary on Friday evening last witnessing some of the bonspiel games.

Al Hunter is up and around again after being confined to his room for several days with a severe cold.

The many friends of Mr. D. Bills of Van Nuys, California will be glad to know that he is progressing favorably after his recent serious illness.

J. C. Shortt and Bill Shortt stopped at Crossfield to visit a few of their friends on their return to Red Deer after attending the Old Timers Round-Up held in Calgary recently.

The East Community Broom Ball team are again on top of the heap by defeating the town 2 to 0 on Thursday night, and winning from Oneil on Saturday night by a score of 3 to 0.

J. P. Metheral had rather a pleasant surprise on Saturday last when he received a cheque from the Alberta Pool for \$125.00. Mr. Metheral had over \$200 coming from the 1928 crop, and with the 1929 over-payment deducted, he received the above mentioned sum.

Mr. and Mrs. Everett Bills are moving back to the farm this week. They have been living in town whilst having a 5-roomed addition built to their home. Everett states that he must have room as his family is steadily growing.

Calgary Power Company Limited

Announce

New Customer and Dealer Policy

THE Calgary Power Company Limited believes that it has a definite responsibility to its customers in assisting to promote and develop the use of electrical appliances which will add to the comfort, convenience and profit of its customers.

Towards this end the Company have developed a Merchandising and Load Building Policy which it believes will be satisfactory to the consumers and to the electrical appliance dealers. Under this policy the Company proposes to assist in the sale of appliances whenever possible through the dealers, except in the case of electric ranges which it believes can be handled and financed by the Company more advantageously than by the dealer.

The Company's Local Managers will gladly co-operate with the local dealers in all matters pertaining to the use of electrical appliances. The advice and service of its Engineering and Technical Departments will always be available.

The Company believes that by co-operation with its consumers and the dealers, advantage can be taken of the existing opportunity for the use of electrical appliances to the mutual benefit of all concerned, and any enquiries will be given prompt and courteous attention by the local managers and all members of this organization.

Local Manager: H. DAVIS, Airdrie

"PATRONIZE YOUR LOCAL DEALER"
